1 short question : Proving differential correlations
* Should arrive at an answer
in 3-4 steps

Governing equations :

$$\begin{aligned}\rightarrow dU &= -PdV + Tds \\ \rightarrow dG &= Vdp - SdT \\ \rightarrow dA &= -Pdr - SdT \\ \rightarrow dH &= Tds + Vdp\end{aligned}$$

Basic identities :

$$\begin{aligned}\left(\frac{\partial x}{\partial y}\right)_x &= 0 \\ \left(\frac{\partial x}{\partial x}\right)_y &= 1\end{aligned}$$

Cyclic triple product :

$$\rightarrow \left(\frac{\partial x}{\partial y}\right)_r \left(\frac{\partial y}{\partial F}\right)_x \left(\frac{\partial F}{\partial x}\right)_y = -1$$

Chain rule!

$$\rightarrow \left(\frac{\partial x}{\partial y} \right)_z = \left(\frac{\partial x}{\partial F} \cdot \frac{\partial F}{\partial y} \right)_z$$

$$\boxed{\left(\frac{\partial x}{\partial y} \right)_z = \left(\frac{\partial x}{\partial F} \right)_z \cdot \left(\frac{\partial F}{\partial y} \right)_z}$$

Maxwell eq/s

\rightarrow Refer recitation #10 notes.

More identities \rightarrow

$$\boxed{\left. \frac{\partial S}{\partial T} \right|_V = \frac{C_V}{T}}$$

$$\& \boxed{\left. \frac{\partial S}{\partial T} \right|_P = \frac{C_P}{T}}$$

$$\boxed{\left. \frac{\partial H}{\partial T} \right|_P = C_P}$$

$$\& \boxed{\left. \frac{\partial H}{\partial P} \right|_T = v - T \left. \frac{\partial v}{\partial T} \right|_P}$$

HW 8 Q 8.1(ii)

$$\left(\frac{\partial p}{\partial v} \right)_s$$

$$\Rightarrow dU = T ds - p dv$$

int. w.r.t p & apply the triple prod.

$$\left(\frac{\partial v}{\partial p} \right)_s = p \left(\frac{\partial s}{\partial p} \right)_v \left(\frac{\partial v}{\partial s} \right)_p$$

$$\rightarrow \left(\frac{\partial s}{\partial T} \right)_v \cdot \left(\frac{\partial T}{\partial p} \right)_v \quad (\text{chain rule})$$

$$\rightarrow \frac{C_v}{T} \left(\frac{\partial T}{\partial p} \right)_v$$

1 conceptual quest 10 pts

→ where do vap & liq coexist?

→ one root region?

→ PV dia / PT dia

→ True or false

→ what is an EoS?

→ why is PR EoS better than IF EoS?

→ intermolecular potential func
virial eq of state

} not on exam!

Thank you
Everyone !!
&

Good Luck
for your exam & the journey ahead.
